# Athearn® Genesis® 4-8-8-4 Big Boy

To add a SoundTraxx Tsunami2 Digital Sound Decoder to your non-sound 4-8-8-4 Big Boy model (2018 or newer model), you'll want to install a TSU-21PNEM Steam-2 decoder.

Since 2009, Athearn has provided the option of purchasing some of their models equipped with Tsunami sound. If you have a Big Boy model without sound that you would like to upgrade, purchase SoundTraxx P.N. 884008. This board is designed to simply plug into the factory 21-pin NEM connector. **You can complete the installation in one to two hours with no modification required to the model!**
