

Athearn® Ready To Roll® SW 1000 & SW 1500

To add a SoundTraxx Tsunami2 Digital Sound Decoder to your non-sound SW 1000 or SW 1500 model (announced in March 2008), you'll want to install a TSU-PNP EMD-2 decoder.

Since 2009, Athearn has provided the option of purchasing some of their models equipped with Tsunami sound. If you have an SW 1000 or SW 1500 model without sound that you would like to upgrade, purchase SoundTraxx P.N. 885024. This board is designed to simply replace the factory PCB that supplies power to the locomotive. **This installation is labor intensive, requires cutting the frame, and could take several hours. It is not for the beginner.**

Tsunami² The Sound Upgrade

SoundTraxx Sound Decoder	TSU-PNP, P.N. 885024	\$110.95
