

Atlas Classic™ RS-3

To add a SoundTraxx Tsunami2 Digital Sound Decoder to your non-sound RS-3 model (announced in August 1999), you'll want to install a TSU-PNP ALCO decoder.

If you have an RS-3 model without sound that you would like to upgrade, purchase SoundTraxx P.N. 885015. This board is designed to simply replace the factory PCB that supplies power to the locomotive. **This installation may take upward of three hours with multiple modifications required to the model!**

Tsunami2™ The Sound Upgrade
