SD40-2

To add a SoundTraxx Tsunami2 Digital Sound Decoder to your non-sound SD40-2 model (announced in May 2005), you'll want to install a TSU-PNP EMD decoder.

If you have an SD40-2 model with or without sound that you would like to upgrade, purchase SoundTraxx P.N. 885013. This board is designed to simply replace the factory PCB that supplies power to the locomotive. **You can complete the installation in one to two hours with no modification required to the model!**

Tsunami²
