## Walthers Proto® 2-8-8-2 Y3

To add a SoundTraxx Tsunami2 Digital Sound Decoder to your non-sound 2-8-8-2 Y3 model (2008 and later releases), you'll want to install a TSU-1100 Steam-2 decoder.

If you have a 2-8-8-2 Y3 model without sound that you would like to upgrade, purchase SoundTraxx P.N. 884006. This board will replace the factory PCB that supplies power to the locomotive. **You can complete the installation in one to two hours with no modification required to the model!**

## Tsunami2™ The Sound Upgrade
